Chibi Miku-san

Hello world,

I am Maybel8ter and as my name states don't expect too much concistency from me. I read through the 400+ chapters on Youtube and decided it should be uploaded to a manga viewer

I am not a Scanulator (I dont know what the title means anyway) and these translations are taken directly from the channel. I am simply taking his subs (slightly refrasing) and editing the raw files I found. This series barely needs translation anyway, so it wont be much work until I get to the later chapters.

I would give raw credits but I found them a while ago via google and cant remeber. I think it was a japanese hentai site that had it. Somewhere on e-hentai or whatever.

So I will try to upload chapters in batches, not sure how to number chapters or volumes since this was a webcomic and every page is considered 1 chapter.
If anyone has any better translations, tips or stuff for better quality contact me through twitter (though probably haven't set up the account yet).
I'll put it in an update.

Raws: Dunno, if someone finds it PM me, probably e-hentai...
